

Every Child Matters

Knowledge for Practitioners

E-learning for the Children's Workforce

The Dialog360 solution includes a wide range of online courses focused on the knowledge needed by people whose work brings them into contact with children and young people

Dialog360 is a web-based learning management system (LMS), providing support for the users and administrators of online learning. Administrators are provided with facilities to maintain learner details, enrol/un-enrol them from courses, assessments and surveys, and monitor their progress.

Everything is provided securely, over the Internet from our UK data centre.

Dialog360 delivers training courses directly to staff via a secure web connection. Any PC can be used to access the courses at any time from any place.
